

CORROSION[®]X

Heavy Equipment Applications

CORROSIONX

- Prevents and stops corrosion, as well as displaces moisture, salt crystals, and other corrosion-causing electrolytes.
- Lubricates under heavy loads and high temperatures.
- Penetrates faster & further than other Penetrates through rust and corrosion.
- Frees parts, bearings and valves that are seized.
- Creates a self-healing, dielectric film.
- Electronically safe. Will not short sensitive circuits or interfere with electrical connections.
- Cleans contact points and improves connectivity.
- Prevents and eliminates battery terminal corrosion.

CORROSIONX HEAVY DUTY

- High performance, thick-film version of CorrosionX provides a super long-term protection against rust.
- Was developed specifically to provide maximum protection against moisture intrusion and resulting rust and corrosion.
- Will slowly penetrate existing rust and corrosion, remove moisture and stop electrolysis, while sealing out moisture.
- CorrosionX Heavy Duty forms a dripless, dynamic, non-hardening, self-healing film that stubbornly resists erosion by splash or spray, including the complete submersion in saltwater.
- Unlike wax-based coatings, it will not dry out, stiffen, or crack under stress.
