SEE WHAT THESE PROFESSIONALS SAY ABOUT REELX[®]

Big Angry Fish, Milan Radonich quoted:

The Team at Big Angry Fish have come to the following conclusions. Our reels and motors are in great working condition so all in all we think the product is the best we have used to date and keeps our gear running well.

Peter MacKellar:

Chasing big fish regularly on light gear can really trash your bearings. Since using ReelX my reels last longer and are smoother than ever to cast. I never use a reel without it now.

GoFish Tackle Co, Greg Hill says:

Nothing leaves our reel repair department without ReelX reel lubricant. ReelX prolongs the life of bearings and ensures continued operation of moving parts.

REELX[®]

**When it's
mission
critical**

FACT SHEET

ReelX is a high-end, extreme pressure lubricant that stops and prevents wear, corrosion and rust the moment it is applied. No waiting, no curing time. It never dries or evaporates.

- Displaces moisture permanently. It contains no wax, tar, silicone or other solids. It does NOT gum up! Never!
- It outperforms all other reel lubricants sporting a lubrication factor of 0,31 Standard engine oil is 1,2. N.B. the lower the figure the better the lubrication! Check your current product if you dare!!
- ReelX can be applied over wet and already corroded metal surfaces but also electronics
- Vastly improves reel performance, bearing life and reliability
- Stops and prevents rust and corrosion the moment it is applied
- Stops electrolysis long term with
- guaranteed dielectric strength of 30,000 volts
- Super fast penetrant for the disassembly of parts during service
- Unlimited shelf life!
- Non flammable
- ReelX will not harm monofilament, circuit boards, rubber, neoprene, any plastics, glass or fibreglass. Pure Product. No thinners. So you can apply ReelX REALLY sparingly!
- Easy on the reels, easy on the wallet. Tough on corrosion!
- If your gear is Mission Critical.....ReelX!
