

NOTHING STICKS BUT THE SHINE

**THOSE WHO KNOW
HAVE TAKEN A SHINE
TO REJEX**

"We were impressed with this product's ability to keep bug splats and exhaust stains from sticking to paint."

"One of the problems that has really bugged me is cleaning bugs, belly grime and exhaust stains from my airplane. RejeX is the answer! I can wipe the bugs off with a wet rag, and belly dirt and exhaust deposits come off with half the effort."

Norman Hoffman, President
Interjet, Inc. • Addison, Texas

"Our fleet has never looked better, nor taken less time and effort to clean, than since we began using RejeX."

Mal Shipton, Owner
GOANA Air Safaris • Australia

REJEX (pronounced "rejects") is an advanced polymer protective coating – not just another wax or polish – that seals and protects aircraft against bug splats, exhaust stains, bird droppings, oil, grease, and belly grime.

- X REJECTS TURBINE EXHAUST RESIDUE**
